ADVANTECH™ Electronic Control System Benefits

- Provides interfaces for coin slides, coin drops, or smart card kits. If it's necessary to move an appliance to a new location and/or change the money acceptor, the ADVANTECH™ Electronic Control System is adaptable - there's no loss of data.
- The open communication architecture between the controller and the smart card allows compatibility with major smart card systems.

- Onboard flash memory allows appliance upgrades to be downloaded from a handheld computer without changing memory chips or controllers. Software cannot be lost during a power outage.
- Machine setups can be stored on a handheld computer and beamed to the appliance for repeated machine installations without setup errors. Smart card data collection is available if a handheld computer is not used.
